The future of vision screening has arrived!

WHAT EVERY PARENT NEEDS TO KNOW ABOUT CHILDREN'S VISION

- Undetected vision disorders are the 4th leading childhood health issue.
- Some vision disorders can lead to permanent vision loss.
- Up to 1 in 4 children has a vision problem and often the parents, teachers and even the children themselves are unaware of the problem.
- 80% of learning occurs visually. Undetected vision disorders may be associated with poor reading and degraded academic performance.
- Correctable vision issues may be misdiagnosed as learning disabilities, attention related disorders, or dyslexia.
- Ethnicity can increase risk in developing eye health issues.
